Multiple View Engine Support

Razor Syntax

Controls!!!

Unobtrusive JavaScript

What Is Razor ?

It's a Spoonful of Sugar (syntactic sugar that is!)

```
@{ code; }
```

```
<h1>@myvarname</h1>
```

```
@{  
    code;  
    code;  
}
```

A white, stylized hand is shown holding a sign that reads "@RAZOR". The hand is positioned in the center of the frame, with the fingers gripping the sign. The sign is a simple, rectangular piece of paper with the text "@RAZOR" written on it in a bold, black, sans-serif font. The background is a plain, light gray color.

@RAZOR

Demo

Enough with this stuff, let's get to the code!
